Medication Assisted Treatment (MAT)

Office-Based Medication Services

Office-based medication treatment is for people who are dependent on opioids such as heroin, fentanyl, or prescription painkillers.

We also provide services for alcohol use disorder.

You may also call directly for an assessment: (760) 631-5000 ext. 2127

What:

Medication Assisted Therapy is a program to support your quest for health. It includes medications to stabilize you; control your cravings and allow your body to heal; preventative health screenings, as well as counseling services.

Where:

Program is located at VCC: Grapevine and VCC: Vale Terrace in Vista, and VCC: North River in Oceanside.

Who:

Age 18 and older, with a diagnosis of Opioid Use Disorder or Alcohol Use Disorder.

How:

Share this brochure with your VCC medical care clinician.

Why:

Recovery from addiction can help you live a healthy and fulfilling life.

What to Expect From Suboxone Medication for Opioid Treatment

- You will be assessed for appropriateness to be in the program
- For treatment of opioid use disorder, you will need to be opiate free for 24 hours to initiate therapy
- A "Controlled Medication Agreement" must be signed and followed
- You will take medication at home after your symptoms are stable
- Counseling services are strongly recommended
